

## COMPANY PROFILE

[www.safenetwork.asia](http://www.safenetwork.asia)

## SAFE NETWORK | Company overview

Since our startup in 2014, We have been providing customer with a unique range of products and services that are fully customisable to homes, Local businesses, Offices, shops and to the hospitality industry. Through our commitment, Hard work and the invaluable trust placed in us by our customers, we have gained insightful Knowledge and skills to fully attain the expertise in our business field

## SAFE NETWORK | Mission

The Mission at SAFE Networks is adding value to contribute to our client's long terms success and competitive strength. This is accomplished by helping clients to identify solutions that improve performance, by assisting in implementing those solutions and aiding in managing the subsequent change. We also believe that the success of every project will be determined by the consideration given during the selection of a competent vendor. We possess proven ability to deliver and are committed to providing quality products. Check out our various Services

## SAFE NETWORK | What we do...

- IT Sales and Support
- Network Installation & Support
- Surveillance System & Security Camera
- Server Rooms and Data Centre Services
- Access Control Systems for Hotels, Apartments and Business
- PABX / IP Phone Installation Services
- Server Configuration , Installation & Maintenance

### IT Sales and Support

'Quick support and quality products' is our promise to our clients. Our reaction time to call-outs are best-in-class and we only supply quality branded products to meet your IT needs. We support our clients on an ad hoc basis, meaning that we find solutions when it's needed while the client sees the cost benefit of not employing a full-time IT team

The right IT solution is crucial to the success of any business. With the correct planning and solutions, information technology can help support your core business functions and move your company forward. With this in mind, we can help you make strategic decisions when it comes to your IT systems

### Network Installation & Support

SAEE NETWORK specializes in networking whether it is a wired or wireless connection throughout buildings. We can run and splice your fiber optics, or run and punch down all Cat6 network cables throughout your building. Our network infrastructure will support not only Network, but Voice & Video as well.
